## WIRE RETRIEVAL AND PROTECTION SYSTEM

This product offers a solid solution to the low-voltage professional by offering a fast, effortless snap-in protection system for your valuable installations. This unique design provides a convenient place to attach a finished and tested wire. It will completely eliminate the frustration and time spent cleaning, repairing or searching for your work during the completion process. Forget how it has been done before. Upgrade your professionalism and efficiency and take your business to the next level with W.R.A.P.S.

**Step 1:** Pull wire through plaster ring. Cut to desired length and terminate. Create a small loop.

**Step 2:** From the back side of the plate, insert a wire tie under the post and through the loop. Attach wire tie and cut excess.

**Step 3:** Once fastened to the back of the protection plate, insert wire and connectors back through the plaster ring.

**Step 4:** Hook feet on the right or bottom side of the plate and push in firmly. Plate will snap into ring. Apply Decal.
